WORK EXPERIENCE

Freelancer   **Little Rock, AR**
JavaScript Developer   *11/2015*
- Designed and developed static websites, custom portals, and dynamic web applications for clients using front-end technologies like HTML, CSS, JavaScript, and ReactJS.
- Developed data models and database designs to plan projects using databases like Firebase, MongoDB, and PostgreSQL and backend technologies like Express.js, NodeJS, and Python. Devised automation, backup, and recovery protocols to preserve and safeguard data.

ATA Martial Arts   **Little Rock, AR**
Web Developer and Administrator   *01/2020 - 05/2021*
- Worked with the marketing department to design, develop and implement new home pages and features for 5 company-owned domains using HTML, CSS, JavaScript. Managed project and web strategic planning for marketing and web development teams. Implemented updates, upgrades, and patches to limit the loss of service.
- Helped transition the legacy website from NationBuilder CMS to Umbraco CMS hosted on Azure Cloud. Specified user access levels for each database segment to protect database integrity and company information. Wrote scripts and processes for data integration and bug fixes.

Arkansas Democrat-Gazette   **Little Rock, AR**
Digital Support Tech   *12/2018 - 01/2020*
- Advocated for end-users, performing tests and problem analysis for server, desktop, and IT infrastructure work. Set up new desktop systems and configured laptops for incoming employees and loaded required software and server permissions. Dealt with 50 customers daily regarding customer complaints, troubleshooting issues, and purchase recommendations.

Design Group Marketing   **Little Rock, AR**
Web Developer   *04/2019 - 10/2019*
- Developed production, test, and beta websites using frontend technologies like HTML, CSS, and JavaScript along with content management systems, including WordPress and Processwire.
- Collaborated with product and marketing team members to update, monitor, and manage 10 websites owned by company clients. Participated in code review meetings, providing input on bugs, inefficiencies, and potential solutions to emergent issues. Modified existing software systems to enhance performance and add new features.

Chef Shuttle   **Little Rock, AR**
Dispatcher   *04/2014 - 06/2016*
- Scheduled and dispatched over 100 daily delivery orders based on various metrics to determine proper routing. Used Python to set driver schedules and track all changes in the computer system to keep records current and accurate.
